

REMARKS

A new set of claims is offered, showing claims 74 and 75 with a correct claim identifier. In the submission of September 13, the claim identifier was given inadvertently as "previously presented". As was clear from the context, including the mark up present in the claims, the identifier should have "currently amended".

Applicants respectfully request reconsideration in light of the amended claims. Applicants believe the claims are patentable for the reasons discussed in their September 13 paper.

The Examiner is invited to telephone the undersigned Applicants' representative if that would be helpful to resolving any issue.

Respectfully submitted,

Dated: 11/23/2004
